

Mobile Web Browser Detection Script

This mobile web browser detection script gives you an easy-to-use script to call the user's mobile web browser on your landing page. Showing information about visitor web browser will increase the conversion rate and CTR of the landing page.

Step 1: Download this javascript file

(<http://cashmoneyaffiliate.com/download/mobile-detect-min/>)

mobile-detect.min (<http://cashmoneyaffiliate.com/download/mobile-detect-min/>)

DOWNLOAD ([http://cashmoneyaffiliate.com/download/mobile-detect-min/?](http://cashmoneyaffiliate.com/download/mobile-detect-min/?wpdmdl=2622&refresh=5acfa40c27d0c1523557388)

[wpdmdl=2622&refresh=5acfa40c27d0c1523557388](http://cashmoneyaffiliate.com/download/mobile-detect-min/?wpdmdl=2622&refresh=5acfa40c27d0c1523557388)) 32.49 KB 247 downloads

Upload the file in the same folder/location where your lander index.html/main file is.

Step 2: Add this code just before the `</head>` tag:

```
<script src="mobile-detect.min.js"></script><script>var md = new MobileDetect(window.navigator.userAgent);</script>
```

Note: If you already added this code to you page once, you don not have to add it again.

Step 3: Add the following line where you want to see the mobile detection info on your page

```
<script>var mm=md.userAgent();if(mm!=null) document.write(mm);</script>
```

Note: You can insert this into a SPAN/DIV tag and use CSS to style it
